

Case Study: Protecting cyber security and client data

By Perpetual Sustainability

12 September 2024

We are committed to protecting the privacy and safeguarding the personal information of our clients.

We have governance, frameworks and monitoring in place to ensure we have resilient technology systems and secure data, including:

- Technology and Cyber Committee, a sub-Committee of the Board, providing oversight of technology and cyber risk. D
- Data Management Framework covering how data are managed across Perpetual Group.
- Internal reporting to management and the Board on the effectiveness of our security controls.
- Enhanced oversight and monitoring of select critical third-party service providers on cyber security.
- Additional data logged and analysed on the use of IT systems and applications to improve incident detection and forensics capabilities.
- Training and tools to educate employees on cyber security risks, email phishing and data privacy.
- Data breach and cyber-incident response plans and regular crisis management response simulation exercises to effectively manage any security incidents.

More information is available in our [Privacy Policy](#).
